September 20, 2005

Dear Ms. Lynda Salvatore

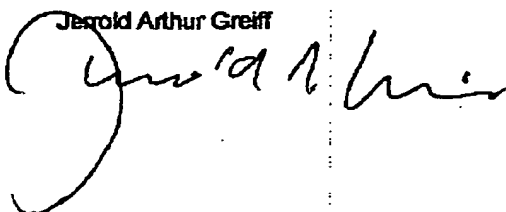

Regarding: Application No. 10/670,296

Thank you for your detailed response to our application and your recommendations and requests for proper titling and sequencing of the text of our application. We have incorporated your requests into our response.

With due respect, we kindly ask you for your reconsideration of the rejection of our claim based on prior anticipation in DE19905871 A1. The German abstract that is referenced specifically and solely describes and makes claim for a brush with a microfiber and foam layer. The brush so described is only used as a brush only and makes no claim for a general patent involving all objects that use a microfiber and foam layer, many of which have subsequently been submitted to the Patent Office. Our application, as described in more detail herein, shows how our object is markedly different from the object described in the German abstract. Our application for a microfiber mouse pad describes a completely different type of product, structure and use, i.e. a flat construct that sits on a desktop.

Please let us know if you require any additional information. Thank you.
